This student lecture focuses on revising Units 3&4 to assist students in gaining the highest mark possible. This lecture will revise aspects of Unit 3 so students are able to focus on two major ecological issues which provide challenges for the present and the future. The consequences on the atmosphere of natural and enhanced greenhouse effects, and issues of biodiversity and its significance in sustaining ecological integrity.

Unit 4 will be supported for students by unpacking focuses of pollution and its relationship to the health of humans and the environment. Understandings of managing the environment to ensure development meets human needs which maintaining ecological integrity of the environment will also be explored.

The revision lecture will be delivered by two experienced Victorian VCE Environmental Science teachers covering Unit 3&4 of the VCAA Study Design.

Tickets are limited so secure your place.
